URBANA

January 2, 1951

Dear Joshua,

I heard from Seb that your brother plans to come here. I understand he is very good. He has apparently applied for admission as a student in Physics-Chem. Biol., which is a mess arranged to provide training for X-ray specialists and photosynthesis people. Why don't you write him to come to Bact.? Gummy and I are always looking for bright boys, and we think we can train them.

I don't want to write this directly to your brother or Seb. You tell Seymour, if you wish.

Happy new year. How are things going? We are all set up, and start some nice stuff.

Lu
